

Table 1. Monthly rainfall and average air temperature from Mesonet for 2023 field season at the Caddo Research Station in Fort Cobb.¹

| Month | Air Temperature (°F) | | | | Rainfall (inches) | | Total |
|------------------------|----------------------|----------|------------|---------------------|-------------------|---------------------|------------------|
| | Avg. Max. | Avg. Low | Daily Mean | Dep. 15-Yearly Avg. | Total | Dep. 15-Yearly Avg. | Degree Days (°F) |
| June | 88 (92) | 66 (71) | 77 (81) | -3 | 6.7 (2.0) | +3.05 | 354 (166) |
| July ² | 93 | 70 | 81 | -1 | 5.2 | +2.23 | 514 |
| August ² | 96 | 69 | 82 | +3 ³ | 0.6 | -1.98 | 471 |
| September ² | 89 | 64 | 76 | +3 | 1.5 | -1.36 | 307 |
| October | 75 | 49 | 61 | 0 | 2.8 | -0.29 | 93 |

¹ All plots planted June 21 and dug Nov. 3. June data for entire month and after planting (in parentheses).

² Incomplete Mesonet records. August departure from 15-year average temperature from Hinton due to extensive incomplete records for Fort Cobb.
